
JOURNEY NON-MAGNETIC MAINTENANCE MANUAL ADDENDUM

Overview:

This document is an addendum to the Journey Maintenance Manual, P/N 107765, and outlines any changes that are necessary for the versions of the Journey printer which do not have the magnetics option installed.

Description:

The magnetic read and write heads have been replaced with a module that can easily be removed in order to upgrade to magnetics at a later time. Therefore, all references in the manual to magnetic capabilities, magnetic read and write heads, magnetic features and magnetic errors should be ignored. Also, keypad display (LCD) references that show profile names may be slightly different.
